<u>Instructions "Total Commander"1 – Multiple Rename Tool</u>

1. Press button 1, 2 or 3, depending on what it says.

2. On the left, select the folder in which the files you want to rename are located. These folders are identical to the folders on your PC.

And then in the window that opens, enter what to replace with what.

Finally confirm with "Start". That's all it was.

Now your files should be renamed. Check this by opening the folder where the files are located on your PC as usual.
